Discussion:

A40 - ANSC 399 - approved with modification to be listed as zero credit hours.

C243 - BIOL 405 - committee approved pending updates based on comments received.

C248 - BIOL 440 - committee approved pending updates based on comments received.

C250 - CHEM 119 - consent agenda was reopened and CHEM 119 was removed from consent; tabled until February 2018; too many programs affected by changes and such short notice before year-end deadline.

C251 - CHEM 120 - consent agenda was reopened and CHEM 120 was removed from consent; tabled until February 2018; too many programs affected by changes and such short notice before year-end deadline.

C252 - CHEM 446 - department requested changes to prerequisite grade and indicated course level complies with college policy.

D45 - BS-USLA-JNS\* - department requested proposal be sent back for additional updates

H21 - Committee approved based on college review of hours and learning outcomes meeting traditional courses.

Discussion of non-traditional versus face-to-face courses. If non-traditional only, there is no difference in syllabus. How can they be identified if they are different?

Discussion on variable credit (0 to 4) versus fixed zero credit for high impact type courses. 399 courses recently approved were zero credit for engineering high impact courses. Other courses currently in course inventory can also be used if credit is needed such as 481, 485, 489, 491, 494.

Discussion on PHYS courses and the prerequisites listed on the courses that appear to be specific for engineering even though they are also going to be considered for core curriculum.

Other Business:

College/program standard guidelines for course level assignments were submitted. They will be posted on the UCC website for future reference. Also, non-traditional format approval process for some of the colleges were also received. Committee approved college guidelines for course level justification and accepted as their guidelines. In addition, if college committee guidelines accept a 400-level course with a 200-level prerequisite, its fine so long as its in the college policy. Course justification should be a written policy submitted to UCC.

UCC college representative should be intimately familiar with their college policies if questions about a course should arise. UCC will honor college level committee approval / enforcement for course level justification. UCC will look at form to make sure course level justification field (prerequisite or college) is complete.

Courses submitted for non-traditional format approval must have two syllabi if they will be taught as both traditional and non-traditional. Procedures should be updated to include these new requirements.

Election of Chair and Vice Chair. The committee re-elected Dr. Jim Herman as Chair and Dr. Robert Knight as Vice Chair of the Undergraduate Curriculum Committee to serve January 2018 through December 2019.

Discussion on the recent inquiry by current students enrolled in a Bush School program seeking tuition/fee exemption due to the Fire Science State Exemption. Committee felt this needed to be brought to the attention of General Counsel for guidance on process for determining how courses/programs are added to the exemption list.
