The committee discussed the following topics and feedback was provided.

1. Level of detail needed for graded descriptions within syllabus.

If there is a list with the weights identified in particular for exams, the associated quantity, and how major dates (exams/major projects) are listed on the course schedule, then collectively, this meets the minimum syllabus requirements for approvals at UCC.

2. COVID statement in syllabus.

Syllabi that include the COVID statement will be accepted by UCC.

3. Number of weeks versus number of modules being listed in a non-traditional syllabus.

Modules will be accepted in non-traditional syllabi so long as the department sends forward that they have evaluated and considered it equivalent. This would then meet UCC standards for minimum syllabus requirements and then meets the state standard. Every college is to have documented procedures and policies that say the college maintains a repository of their actions. If the state or the accreditation bodies request proof, then the proof would need to come directly from the department for the documentation.

4. Undergraduate course level justification.

Recommendation would be to make sure the undergraduate course level justification is specified on all new and edited courses.

---

The committee discussed the following under Other Business

1. Course Description Format

Since the catalogs are fully online and are no longer printed, the topic was brought forth to the committee to consider relaxing catalog course description constraints and allow full sentence structured descriptions within catalog. As discussed, the benefit would be to provide more descriptive information for the students to have a better understanding of what the course is about. The committee decided to take this topic back to colleges/college committees and for UCC to discuss at a later date around January/February.
