The committee discussed the following under Other Business.

4. Learning outcomes reference material

Minimum Syllabus Requirements (MSRs) learning outcomes section currently provides the Center for Teaching Excellence (CTE) and the Office of Institutional Effectiveness & Evaluation (OIEE) websites, however learning outcome content not on either office websites. Dr. Alicia Dorsey from the Office of Institutional Effectiveness and Evaluation shared that there is collaboration between CTE and OIEE in order to gather learning outcome resources for faculty to use for developing learning outcomes. Dr. Alicia Dorsey added that possibly at the start of the new year that CTE and OIEE could present the status of their learning outcomes resources to the committee. The committee could develop a task force to assist providing feedback/resources to CTE and OIEE.

5. Course level justification

As a reminder, all colleges have published policies and procedures that address how each college evaluates curricular requests, college approach for defining course level, and how each college determines how a non-traditional course meets the standard of having equivalent learning outcomes and contact hours. It was discussed that it might be useful for each college to review and make sure these published policies and procedures are current and that each college addresses course level justification prerequisites. The purpose of this discussion was to bring awareness and remind each committee member of these policies and to take them back to their respective college to ensure policies are updated, current, and that each college is following their own policies and procedures. Dr. Alicia Dorsey added to the discussion that this standard to demonstrate coherent curriculum and the progression of knowledge is a US DOE mandated standard. This must be closely reviewed for offsite and onsite accreditation review and will likely be asked by site visitors in the Spring how the college determines, demonstrates, and ensures the progression of knowledge.

It was also discussed for the committee to set up a task force in the spring to develop a powerpoint deck or document to provide advice/feedback from UCC with respect to items brought forward. The committee would develop materials to release across the University through UCC representatives that provides a set of items that the committee consistently sees that are errors and/or concerns to be sent back.

Informational item: The late work policy provided in the Minimum Syllabus Requirements (MSRs) and the syllabus template at some point had gotten out of alignment and had slightly different language from each other. Dr. Jasperson discussed that the late work policy in the MSRs have been updated with the Faculty Senate so that both the MSRs and the minimum syllabus template now have identical wording for the late work policy section.
